

[Home](#) > Treatment of external genital and perianal warts

Generic Name:

Imiquimod

Trade Name:

Zyclara

Company:

Graceway

Notes:

Approval of [Zyclara](#) was based on data from two Phase III, double-blind studies that evaluated the complete clearance of warts across several anatomical locations with imiquimod 3.75% cream. Approximately 28.3% of patients using once-daily imiquimod cream for up to 8 weeks had complete clearance of all warts compared with 9.4% of those given placebo cream. In addition, only 15% of patients treated with imiquimod experienced a recurrence within 12 weeks. The product was originally approved for the treatment of actinic keratoses of the face or balding scalp in immunocompetent patients.

Medication Monitor Categories:

[Supplemental Approvals](#)

Use:

Treatment of external genital and perianal warts in patients 12 years of age and older
